/Qt/qt-proj/MattyNotes/mattyclocks.h

```
graph BT; A["/home/matty/Документы  
/Qt/qt-proj/MattyNotes/mattyclocks.cpp"] --> C["/home/matty/Документы  
/Qt/qt-proj/MattyNotes/mattyclocks.h"]; B["/home/matty/Документы  
/Qt/qt-proj/MattyNotes/mattynotesmainwindow.cpp"] --> C;
```

The diagram illustrates a dependency relationship in a C++ project. At the top, a gray-shaded box represents the header file `mattyclocks.h`. Below it, two white boxes represent source files: `mattyclocks.cpp` on the left and `mattynotesmainwindow.cpp` on the right. Blue arrows point from each source file box up to the header file box, indicating that both source files include or depend on the header file.
