```
graph BT; A["/home/matty/Документы  
/Qt/qt-proj/MattyNotes/mattynotesmainwindow.cpp"] --> B["/home/matty/Документы  
/Qt/qt-proj/MattyNotes/mattystylesheeteditor.h"]; C["/home/matty/Документы  
/Qt/qt-proj/MattyNotes/mattystylesheeteditor.cpp"] --> B;
```

The diagram illustrates a file dependency structure. At the top is a grey rectangular box containing the path and filename of a header file: `/home/matty/Документы/Qt/qt-proj/MattyNotes/mattystylesheeteditor.h`. Below this box are two white rectangular boxes. The box on the left contains the path and filename of a source file: `/home/matty/Документы/Qt/qt-proj/MattyNotes/mattynotesmainwindow.cpp`. The box on the right contains the path and filename of another source file: `/home/matty/Документы/Qt/qt-proj/MattyNotes/mattystylesheeteditor.cpp`. Two blue arrows point from the bottom-right corner of the left box and the bottom-left corner of the right box towards the bottom edge of the top box, indicating that both source files include or depend on the header file.
